SUMMARY

Full stack developer who ships complete products — from database and API to a polished, responsive UI. 15+ years across **Python/Django + FastAPI** backends and **React/TypeScript + Tailwind** frontends, with **Tauri** for desktop. I deliver the whole slice: data model, REST API, frontend, auth, deployment, and CI. Strong on correctness and security (built-in hardening, RBAC, GDPR-aware data), and comfortable owning a site end-to-end as a webmaster.
