

Abdulwahed Mansour

Technical Writer / Localization & Translation / Coding Instructor

Stockholm, Sweden · +46 76 930 8145 · abdulwahed.mansour@gmail.com

github.com/abdulwahed-sweden · linkedin.com/in/abdulwahed-sweden · EU work eligibility · Stockholm / remote

Covers: Technical Writer · Documentation Specialist · Localization Specialist · Arabic–English Translator · Coding Instructor · IT Trainer

SUMMARY

Engineer-turned-communicator: 15+ years building software, paired with a strong record of writing clear technical documentation and teaching complex topics. I write docs that developers actually use — API references, runbooks, architecture overviews, audit reports — because I've lived on both sides. **Native Arabic, professional English, working Swedish, basic French**, which makes me effective at both technical translation and localization for engineering products. I can take a deep technical subject and make it understandable to the exact audience that needs it.

WHAT I DO

AREA	DETAIL
Technical writing	API docs, READMEs, runbooks, architecture/design docs, release notes, audit reports
Developer education	teaching programming (Python, Rust, web), mentoring, building learning materials
Localization / translation	Arabic ↔ English technical translation; localizing software UI and docs (built multi-language apps SV/EN/AR/NO)
Tooling	Markdown, Git/GitHub, Swagger/ReDoc (API docs), static site generators, diagrams
Subject depth	backend, security, blockchain, cloud — I can write accurately about hard topics
Languages	Arabic (native) · English (professional) · Swedish (working) · French (basic)

EVIDENCE

- **Authored 200K+ lines of code with their documentation** — READMEs, API references, and architecture notes across 35+ projects.
- **Long-form technical reports:** wrote a full portfolio audit report and multiple security finding write-ups (reproducible PoCs explained step-by-step) for platforms like Immunefi, Sherlock, and Code4rena.
- **API documentation:** delivered auto-generated and hand-written API docs (Swagger/ReDoc) for REST/FastAPI services.
- **Localization in practice:** built applications with multi-language interfaces (Swedish, English, Arabic, Norwegian), handling RTL Arabic and locale-specific formatting.
- **Teaching-ready material:** clear, structured explanations of backend, security, and blockchain concepts.

EXPERIENCE

Independent Software Engineer & Technical Author — 2010 – Present · Stockholm

- Wrote and maintained all documentation for 35+ projects; produced architecture overviews, runbooks, and audit reports for technical and mixed audiences.
- Communicated complex security findings clearly to protocol teams during responsible disclosure.

Security Researcher (part-time) — 2022 – Present · Remote

- Translated deep technical vulnerabilities into precise, reproducible write-ups that non-specialist stakeholders could act on.

EDUCATION

2010 Linköping University (SE) — SW Engineer equivalency · 2004 Paris 6 (FR) · 1999 Al-Azhar — technical engineering
