Re: Application for Smart Contract Auditor / Blockchain Security Engineer

Dear [Hiring Manager],

I'm applying for the **Smart Contract Auditor / Blockchain Security Engineer** role at **[Company]**. [One specific sentence on why this company — their protocol, chain, or audit practice]. I work the full DeFi stack: protocol design, smart-contract auditing, and on-chain systems.

I shipped a multi-chain ERC-4626 vault protocol with on-chain invariant guards (1,630 tests, including 1,000-run fuzzing) across EVM and Solana, and I run a production Aave V3 liquidation bot on Base mainnet in modern Rust alloy. On the offensive side I discovered a vulnerability *class* across Aave V4, Morpho Blue, and Curve crvUSD (responsibly disclosed) — and I traced an on-chain theft across 42,479 addresses in 36 seconds. I write contracts the way an auditor reads them: invariants first, fuzzing always, a reproducible PoC for every claim — the rigour [Company] expects.

I'm based in Stockholm with EU work eligibility and work fully remote-friendly (English and Arabic, working Swedish). I'd welcome the chance to discuss how I can help [Company] [specific goal]. Thank you for your time.

Sincerely,

Abdulwahed Mansour
