Re: Application for [Technical Writer / Translator]

Dear [Hiring Manager],

I'm applying for the **[role title]** position at **[Company]**. [One specific sentence on why this company — their docs, product, or audience]. I'm an engineer who writes: I make hard technical topics clear for the people who need them.

Across 15+ years and 35+ projects I've authored the documentation that ships with the code — API references, runbooks, architecture overviews, and long-form security audit reports that explain complex vulnerabilities step-by-step to mixed audiences. I produce both hand-written and auto-generated API docs (Swagger/ReDoc), and I've localized software into multiple languages, including right-to-left Arabic. As a native Arabic speaker with professional English and working Swedish, I'm equally effective at Arabic↔English technical translation and at writing clear English documentation. Because I understand the subject deeply, the result is accurate, not just readable — which is what [Company] needs.

I'm based in Stockholm with EU work eligibility and open to remote. I'd welcome the chance to discuss how I can help [Company] [specific goal]. Thank you for your time.

Sincerely,

Abdulwahed Mansour
