Re: Application for [IT Support / Solutions Engineer]

Dear [Hiring Manager],

I'm applying for the **[role title]** position at **[Company]**. [One specific sentence on why this company — their customers, product, or support culture]. I combine deep technical roots with a genuine enjoyment of helping people solve problems — and I do it in three languages.

With 15+ years building and running software, I diagnose issues across Windows, Linux, and macOS, networks, databases, and web applications — and I find root causes fast because I build these systems myself. I've deployed and supported live services end-to-end (monitoring, alerting, incident handling) and automated recurring tasks in Python and Bash so they stop coming back. Just as important, I explain technical issues clearly to non-technical users. My Arabic (native), English (professional), and Swedish are a real asset for supporting diverse users and international customers at [Company].

I'm based in Stockholm with EU work eligibility. I'd welcome the chance to discuss how I can help [Company] deliver excellent technical support. Thank you for your time.

Sincerely,

Abdulwahed Mansour
