Re: Application for Full Stack / Web Developer

Dear [Hiring Manager],

I'm applying for the **Full Stack / Web Developer** role at **[Company]**. [One specific sentence on why this company — their product, users, or a feature you admire]. I ship complete products: database and API through to a polished, responsive UI.

I work end-to-end with Python/Django + FastAPI on the backend and React/TypeScript + Tailwind on the frontend. I've delivered a full employment platform with 100+ API endpoints and a multi-language interface (Swedish, English, Arabic, Norwegian), a booking app with an auto-documented REST API, and a cross-platform desktop app on Tauri. I designed and deployed my own portfolio site in React/TypeScript solo. I care about the whole slice — auth, data model, UX, deployment, and CI — and I build it security-aware from the start, which fits how [Company] seems to work.

I'm based in Stockholm with EU work eligibility (English and Arabic, working Swedish). I'd welcome the chance to discuss how I can help [Company] [specific goal]. Thank you for your time.

Sincerely,

Abdulwahed Mansour
